

SKUNKWORKS ACADEMY

INDIVIDUAL DEVELOPMENT ROADMAP

Fernanda Koppe Souto Maior Macias

AI-Enabled Business Operations, Process Improvement and Strategic
Executive Support

REPORT DATE	6 August 2026
REVIEW PERIOD	12 months with 30, 60 and 90-day gates
PRIMARY MODE	Instructor-led, applied labs and portfolio evidence
PROPOSED REVIEWER	Raydo Matthee / Skunkworks Academy

Document status: Provisional roadmap for validation. Recommendations are derived from Fernanda's self-assessment and should be confirmed during the first development consultation.

CAREER DIRECTION AND PLACEMENT

01 Executive Summary

PROVISIONAL PLACEMENT

Business Operations and Digital Transformation Practitioner with a near-term positioning focus on AI-enabled executive support, process improvement, project coordination and operational analytics.

Fernanda brings a strong operational base: more than eight years of executive and administrative support, advanced stakeholder and calendar management, six or more years of project coordination and process improvement, and solid financial-administration and vendor-management experience. She also reports advanced use of Microsoft Office, Google Workspace and AI productivity tools, and experience leading teams and coordinating cross-functional execution.

Her stated goal is to secure or improve employment in the short term, become a subject-matter expert within three to five years, and progress into leadership over the longer term. The recommended pathway therefore combines immediate job-market positioning with practical capability building in data analysis, low-code automation, process design, digital collaboration and strategic business management.

12-MONTH NORTH STAR

By August 2027, Fernanda should be able to lead an AI-enabled business-operations improvement initiative, translate executive and operational needs into structured processes, produce decision-ready dashboards, configure a controlled workflow automation, and present a credible portfolio for senior executive-support, operations, project-coordination or business-transformation roles.

Profile element	Assessment evidence	IDR implication
Current role	Executive Secretary; Administration / Business / Finance	Build from an experienced operations base rather than treating the pathway as entry-level.
Preferred learning	Instructor-led learning; creating practical lab exercises	Use facilitated workshops, demonstrations, coached builds and tangible weekly outputs.
Work style	Flexible work location; comfortable independently and with people	Use hybrid delivery and cross-functional projects.
Learning capacity	More than 15 hours currently and more than 15 additional hours if required	Plan a sustainable 8-12 structured hours weekly; reserve extra time for short sprint periods.
Mentoring response	Unsure; prefers regular one-on-one feedback	Start with a 30-day trial mentoring cadence and confirm fit.

SOURCE EVIDENCE

02 Assessment Basis and Career Profile

NAME	Fernanda Koppe Souto Maior Macias
AGE	36
FUNCTION	Executive Secretary - Administration / Business / Finance
EMAIL	fernandasmmacias@hotmail.com
LINKEDIN	linkedin.com/in/fernanda-m-545840400
CREDLY	Fernanda Macias Credly profile

Self-reported strengths

- Executive and administrative support: advanced, with more than eight years of experience.
- Stakeholder, calendar and travel management: advanced, including senior-leadership support and international coordination.
- Project coordination and process improvement: six or more years, including deadlines, cross-functional teams, suppliers and execution tracking.
- Financial administration: budget tracking, expenses and operational finance support.
- Digital productivity: advanced Microsoft Office, Google Workspace and AI productivity tools.
- Communication: professional English, native Portuguese, conversational Polish and intermediate Spanish.
- Leadership exposure: team supervision, management and coordination in fast-paced business environments.

Career aspirations

Horizon	Self-assessment statement	Roadmap translation
1-2 years	Get a job or increase current opportunity	Position for senior executive support, operations coordination, project support or business operations roles.
3-5 years	Become a subject-matter expert in a specific technology	Specialise in AI-enabled operations, process automation, operational analytics or digital workplace optimisation.
5+ years	Attain a leadership position	Progress toward Operations Manager, Chief of Staff, Business Transformation Lead or Digital Operations Manager responsibilities.

EVIDENCE BOUNDARY

This IDR is based on self-reported assessment responses. Technical ratings, credential choices and role positioning are provisional until validated through an interview, practical baseline exercise and portfolio review.

CURRENT STATE TO TARGET STATE

03 Capability Profile and Priority Gaps

Capability radar (provisional)

Blue = current narrative estimate; orange = target

Provisional capability profile

Blue = current provisional rating; orange marker = 12-month target

Priority development gaps

Priorit y	Development gap	Target evidence
1	Advanced data analysis and visualisation	A decision-ready operational dashboard with documented KPI definitions.
2	Workflow automation and low-code design	A tested approval or coordination workflow with control points and rollback notes.
3	Process architecture and continuous improvement	Current-state and future-state process maps, SOPs and an improvement backlog.
4	Strategic business management	A concise business case showing baseline, value, cost, risk and governance.
5	Technology governance and data protection	A data-classification, access, retention and responsible-AI checklist.
6	Portfolio and market positioning	A targeted CV, LinkedIn narrative, capability portfolio and interview evidence.

PRIMARY AND SECONDARY TRACKS

04 Recommended Development Pathway

Track	Purpose	Target role families	Core capabilities
Primary: AI-Enabled Business Operations	Convert existing executive-support and operations experience into measurable digital-operating capability.	Senior Executive Assistant; Executive Operations Coordinator; Project Coordinator; Business Operations Analyst; Operations Manager.	Process mapping, operational analytics, AI productivity, workflow automation, stakeholder management, governance.
Secondary: Strategic Executive Support and Chief-of-Staff Readiness	Develop stronger strategic judgement, leadership cadence, executive communication and initiative governance.	Executive Business Partner; Chief of Staff (associate pathway); Programme Office Coordinator; Transformation Office Analyst.	Executive briefings, decision logs, portfolio governance, meeting systems, business cases, change communication.
Optional specialisation: Learning Operations and Practical Facilitation	Use Fernanda's preference for practical lab creation and instructor-led learning to support enablement programmes.	Learning Operations Coordinator; Training Programme Coordinator; Business Skills Facilitator.	Lab design, learner instructions, assessment evidence, facilitation, feedback and quality assurance.

Role-positioning statement

RECOMMENDED PROFESSIONAL NARRATIVE

Fernanda is an experienced executive-support and business-operations professional who combines disciplined coordination, stakeholder management, financial administration and process improvement with modern AI productivity tools. She is developing applied capability in automation and analytics to help organisations operate with greater structure, speed and decision quality.

Development principles

- Capability before credentials: every learning activity must produce evidence or improve an active business process.
- Use approved or synthetic data: never publish confidential executive, customer, financial or employee information.
- Build on experience: do not repeat basic administration training unless a diagnostic identifies a gap.
- Focus the technology stack: prioritise Microsoft 365 / Power Platform and Google Workspace before adding unrelated platforms.
- Translate learning into job language: every project should produce a CV bullet, interview story and portfolio artefact.
- Use sustainable intensity: the assessment indicates very high available time; the baseline programme should remain at 8-12 structured hours weekly.

AUGUST 2026 TO AUGUST 2027

05 12-Month Roadmap

Phase	Outcome	Key actions	Evidence / gate
0-30 days: Validation and positioning	Confirm target roles, baseline capability and learning cadence.	Career consultation; role shortlist; Excel/data diagnostic; automation diagnostic; CV and LinkedIn refresh; select one operational process.	Approved IDR; baseline scores; target-role matrix; first mentor review.
31-60 days: Process and data foundation	Create a reliable operational baseline.	Map current and future process; define owners, hand-offs and risks; inventory data sources; define 8-12 KPIs.	Process maps; SOP draft; data inventory; KPI dictionary; 60-day review.
61-90 days: Prototype	Demonstrate applied automation and decision support.	Build one controlled workflow; build one dashboard; document testing, permissions and exception handling.	Working prototype; test log; executive briefing; 90-day go / adjust decision.
Months 4-6: Capability proof	Complete structured learning and publish sanitised evidence.	Finish selected credential milestones; refine project artefacts; conduct stakeholder presentation; complete second project.	Two portfolio artefacts; one credential milestone; manager / mentor feedback.
Months 7-9: Leadership pilot	Lead a small improvement initiative.	Define charter, baseline, owners and benefits; facilitate weekly review; manage risks; measure results.	Pilot report; benefits dashboard; lessons learned; leadership evidence.
Months 10-12: Transition	Secure a stronger role or expanded responsibilities.	Target applications or internal progression; interview practice; portfolio presentation; 12-month review and next IDR.	Updated role or defined progression plan; final capability review; next 12-month roadmap.

INSTRUCTOR-LED AND EVIDENCE-BASED

06 12-Week Applied Learning Sprint

Week	Capability focus	Instructor-led session	Practical lab / deliverable
1	Career and capability baseline	Target-role analysis, strengths translation and learning governance.	Role matrix, baseline self-rating and updated professional summary.
2	Advanced spreadsheet analysis	Data structure, validation, lookup logic, pivot analysis and quality checks.	Clean and analyse a synthetic operations dataset; document assumptions.
3	Process mapping and SOP design	Current-state / future-state mapping, roles, hand-offs and exceptions.	BPMN-style process map and two-page SOP.
4	Project coordination and agile execution	Charter, scope, RAID log, work breakdown and meeting cadence.	Mini project plan with RAID register and stakeholder map.
5	AI productivity and prompting	Responsible use of ChatGPT / Copilot-style tools for executive and operations work.	Prompt library for briefings, correspondence, meeting analysis and process documentation.
6	Workflow automation fundamentals	Triggers, approvals, conditions, notifications, controls and rollback.	Design and prototype a low-code approval or task-coordination workflow.
7	Operational data visualisation	KPI design, Power BI / Looker Studio concepts and executive storytelling.	Build an executive dashboard from synthetic data.
8	Finance and operations insight	Budget tracking, variance, collections / cost / service metrics and commentary.	Create a monthly operations and finance review pack.
9	Digital workplace optimisation	Microsoft 365 and Google Workspace collaboration, records and governance.	Design a controlled team workspace and document-management standard.
10	Privacy, security and responsible AI	Data classification, access, retention, vendor risk and acceptable AI use.	Create a privacy, access and responsible-AI control checklist.
11	Capstone build	Integrate process, data, automation and reporting into one improvement case.	Complete capstone prototype, test evidence and benefits estimate.
12	Executive presentation and career conversion	Present value, lessons, limitations and next actions; translate into job evidence.	10-minute presentation, portfolio pack, CV bullets and 90-day review.

SPRINT COMPLETION RULE

A week is complete only when Fernanda can explain the concept, demonstrate the output, document decisions and receive review feedback. Watching content without producing evidence does not count as completion.

STRUCTURED CAPABILITY BUILDING

07 Learning Curriculum and Credential Targets

Curriculum area	Learning outcomes	Recommended evidence
Business process improvement	Map processes, identify constraints, define control points and measure improvement.	Process map, SOP, improvement backlog and before / after metric.
Data analysis	Clean data, validate quality, analyse trends and explain business implications.	Analysis workbook and data-quality log.
Operational reporting	Define KPIs, create dashboards and write executive commentary.	Dashboard, KPI dictionary and one-page monthly brief.
Low-code automation	Design workflows with approvals, permissions, exceptions, logging and rollback.	Prototype, test plan, exception log and user guide.
AI-enabled productivity	Use AI tools for drafting, synthesis and analysis with verification and privacy controls.	Prompt library, verification checklist and before / after productivity measure.
Project and change coordination	Define scope, stakeholders, risk, communication and adoption.	Project charter, RAID log, communication plan and retrospective.
Leadership and strategic support	Frame decisions, prioritise work, facilitate reviews and communicate value.	Decision brief, stakeholder presentation and leadership reflection.

Credential and badge targets

Priority	Target milestone	Purpose	Timing
Core	Enterprise Design Thinking or equivalent practitioner milestone	Strengthen problem framing, stakeholder empathy and outcome design.	Weeks 1-4
Core	AI fundamentals and responsible-use learning milestone	Formalise AI concepts, verification, risk and governance.	Weeks 4-6
Core	Advanced Excel / spreadsheet analytics milestone	Validate practical analytical capability beyond general Office experience.	Weeks 2-8
Core	Power BI or equivalent data-visualisation learning milestone	Support dashboard development and operational storytelling.	Weeks 6-10
Core	Power Automate / workflow automation applied milestone	Validate ability to build and govern a workflow.	Weeks 6-12
Core	Project management fundamentals milestone	Formalise project planning, risks, stakeholders and delivery cadence.	Months 1-4
Supporting	Microsoft 365 or Google Workspace productivity / administration pathway	Strengthen digital workplace governance and collaboration design.	Months 2-5
Supporting	Data privacy, security and responsible-AI awareness credential	Support compliant operational technology use.	Months 2-6
Stretch	Power Platform fundamentals certification readiness	Provide an externally recognisable foundation for low-code work.	Months 4-9
Stretch	Business analysis or process-improvement credential readiness	Support transition into analyst, transformation or operations-improvement roles.	Months 7-12

Credential titles and availability should be verified before enrolment. Where a formal exam is not justified, complete the learning path and retain assessed project evidence instead.

EVIDENCE OF BUSINESS VALUE

08 Applied Portfolio Projects

Project	Business problem	Required outputs	Success measure
1. Executive Operations Control Centre	Executive priorities, meetings, decisions and actions are often fragmented across email, calendars and documents.	Synthetic executive dashboard; decision log; action tracker; meeting cadence; access model.	Improved action visibility and fewer overdue items in the simulated workflow.
2. Process Improvement and SOP Pack	An administrative or finance process has unclear hand-offs, duplicated effort or weak exception handling.	Current / future map; SOP; RACI; risk register; improvement backlog.	Clear cycle-time or quality baseline and approved future-state design.
3. Controlled Workflow Automation	A recurring approval, onboarding, expense, supplier or document process relies on manual reminders.	Automation prototype; permissions; exception path; test cases; rollback and user guide.	Reduced manual touches and complete test pass rate using synthetic data.
4. Operational and Financial Dashboard	Leaders lack a concise view of cost, service, workload or performance.	Clean dataset; KPI dictionary; dashboard; monthly narrative; data-quality log.	Decision-ready dashboard with traceable metrics and clear assumptions.
5. AI-Assisted Executive Briefing System	Briefings and recurring reports consume time and vary in quality.	Prompt patterns; source-verification checklist; briefing template; privacy rules; time comparison.	Demonstrated time saving without unsupported claims or sensitive-data exposure.

Portfolio publication standard

- Use synthetic or explicitly authorised data only.
- Remove company names, personal information, financial account details and confidential correspondence.
- Include a one-page README: problem, role, process, tools, controls, result, limitations and next step.
- Include screenshots only when all sensitive information has been removed.
- State whether the output is a prototype, simulation or production implementation.
- Translate every artefact into one CV achievement statement and one interview story.

MEASURABLE OUTCOMES

09 Development Goals and KPIs

Goal	Measure / evidence	Target date	Review owner
1. Career positioning	Target-role matrix, tailored CV, LinkedIn summary and 10-role opportunity list.	31 Aug 2026	Fernanda + reviewer
2. Process and data baseline	One validated process map, data inventory and KPI dictionary.	30 Sep 2026	Fernanda + process stakeholder
3. Automation prototype	Controlled low-code workflow with test cases and user guide.	30 Nov 2026	Fernanda + technical reviewer
4. Decision dashboard	Executive dashboard with reconciled data and written commentary.	31 Jan 2027	Fernanda + business reviewer
5. Credential milestone	At least one assessed learning or certification milestone completed.	31 Mar 2027	Fernanda + mentor
6. Leadership pilot	Lead a small improvement initiative and present measurable results.	30 Jun 2027	Fernanda + sponsor
7. Role transition	Secure stronger employment, expanded responsibility or an approved transition plan.	6 Aug 2027	Fernanda + reviewer

Operating KPIs

KPI	Definition	Target
Learning consistency	Structured learning sessions completed / planned sessions.	At least 85% monthly.
Evidence completion	Weeks with an accepted practical deliverable.	10 of 12 sprint weeks.
Portfolio quality	Artefacts meeting problem, evidence, control, result and privacy criteria.	Minimum 4 accepted artefacts by March 2027.
Automation quality	Required test cases passed with documented exceptions.	100% critical tests; no unresolved high-risk defect.
Business value	Measured improvement against an approved baseline.	One quantified pilot result by June 2027.
Career conversion	Targeted applications, interviews or internal progression discussions.	Defined monthly target after positioning review.
Feedback response	Agreed review actions completed by due date.	At least 90%.

SUSTAINABLE EXECUTION

10 Weekly Operating Rhythm and Mentoring

Day / cadence	Time guide	Activity	Output
Monday	60-90 min	Instructor-led theory and demonstration.	Notes, knowledge check and questions.
Tuesday	90 min	Guided practical lab.	Working file, process map, automation or dataset.
Wednesday	45-60 min	Career positioning or credential study.	CV / LinkedIn improvement or assessed module progress.
Thursday	90 min	Applied project build.	Portfolio increment and decision log.
Friday	45 min	Documentation and reflection.	README, lessons learned, risk update and next actions.
Saturday	2-3 hours	Deep work, assignment and portfolio.	Completed weekly deliverable.
Fortnightly	45 min	One-on-one mentor / reviewer session.	Feedback, decisions, blockers and commitments.

Review and feedback structure

Review gate	Agenda	Decision
First consultation	Validate role targets, learning time, access to tools, language needs, current certificates and project context.	Approve or revise placement and sprint.
30-day review	Review baseline, positioning package, learning consistency and first artefacts.	Continue, narrow focus or adjust support.
60-day review	Review process / data baseline, technical progress and emerging blockers.	Approve prototype scope.
90-day review	Demonstrate workflow and dashboard; review evidence quality and career conversion.	Go, adjust or stop specific learning track.
Quarterly thereafter	Assess business impact, credential relevance, leadership behaviour and role opportunities.	Set next-quarter outcomes.

MENTOR PAIRING RECOMMENDATION

Fernanda selected "Unsure" regarding mentoring but prefers regular one-on-one feedback. Use a 30-day trial pairing with a clear agenda, confidentiality boundary and measurable commitments before confirming the longer-term relationship.

DELIVERY GOVERNANCE

11 Risks, Controls and Support Requirements

Risk	Likelihood / impact	Control	Early warning
Overcommitment or burnout	Medium / High	Limit baseline plan to 8-12 structured hours; use sprint intensity only when agreed.	Missed sessions, declining quality or excessive unfinished work.
Too many tools and credentials	High / Medium	Prioritise one analytics tool, one automation platform and one core credential at a time.	Multiple incomplete courses without portfolio evidence.
Experience not translated into market language	Medium / High	Link each project to target-role competencies, CV bullets and interview stories.	Strong experience but low interview conversion.
Confidential-data exposure	Low / High	Use synthetic / authorised data, least privilege, redaction and secure storage.	Personal, executive, financial or customer data in public artefacts.
Automation without controls	Medium / High	Document ownership, permissions, exceptions, testing, audit and rollback.	Unapproved workflow or unhandled failure path.
Credential-first behaviour	Medium / Medium	Require applied evidence for every credential milestone.	Badges completed without demonstrated capability.
Mentoring mismatch	Medium / Medium	Use trial period, explicit expectations and regular feedback.	Sessions lack decisions, actions or psychological safety.
International career transition uncertainty	Medium / High	Define target markets, work authorisation, language positioning and role criteria early.	Broad applications with unclear role fit.

Support required from Skunkworks Academy / reviewer

- A 60-minute validation consultation and access to an agreed assessment rubric.
- Instructor-led sessions or curated workshops for analytics, automation, AI governance and project execution.
- A safe lab environment or synthetic datasets for projects.
- Fortnightly review during the first 90 days.
- Portfolio and CV review after weeks 6 and 12.
- Credential funding only after the relevant learning and practical readiness gates are met.
- Introductions to cross-functional or simulated business-improvement projects where appropriate.

APPROVAL AND NEXT ACTIONS

12 Review, Sign-Off and Source Summary

Action	Owner	Due
Confirm the target-role shortlist and primary technology stack.	Fernanda + reviewer	Within 5 working days
Complete the data / spreadsheet and automation baseline exercises.	Fernanda	Within 10 working days
Select the first operational process and synthetic project dataset.	Fernanda + process stakeholder	Within 10 working days
Confirm the 12-week timetable and trial mentoring cadence.	Fernanda + reviewer	Within 10 working days
Approve the first credential milestone after diagnostic results.	Reviewer	By 30-day review

Sign-off

Role	Name	Signature	Date
Participant	Fernanda Koppe Souto Maior Macias		
Reviewer / mentor	Raydo Matthee (proposed)		
Manager / sponsor	To be confirmed		
HR / learning representative	To be confirmed		

Assessment-response summary

Assessment area	Response used in this IDR
Technology alignment	Google, Microsoft and professional skills; interest in AI, automation, data analysis and digital collaboration.
Passion / project interests	Business operations, process improvement, productivity tools and customer experience.
Learning preference	Instructor-led learning and creation of practical lab exercises.
Leadership evidence	Team supervision, cross-functional coordination, executive-priority management, project deadlines and supplier / stakeholder work.
Primary challenge	Transitioning substantial experience into international opportunities with greater strategic responsibility.
Support need	Advanced data analysis, automation tools and strategic business management.
Long-term impact	Help organisations become more efficient, structured and prepared for growth through operations, leadership, process improvement and technology adoption.

ACTIVATION REQUIREMENTS

13 Validation Consultation and Implementation Checklist

First consultation agenda

Agenda item	Validation question	Decision / output
Target roles	Which roles, countries, work arrangements and salary range are realistic priorities?	Approved role shortlist and market criteria.
Existing evidence	Which certificates, work samples, systems and quantified achievements can be verified?	Evidence inventory and portfolio gap list.
Technical baseline	What can Fernanda currently demonstrate in spreadsheet analysis, dashboards, workflow tools and AI-assisted work?	Baseline rating and adjusted curriculum.
Operational project	Which real or simulated process provides a safe, relevant capstone?	Approved project charter and data boundary.
Learning logistics	Which weekly times, instructor sessions, software licences and language support are available?	Confirmed timetable and resource plan.
Mentoring fit	What does Fernanda expect from one-on-one reviews, and what can the reviewer provide?	30-day trial mentoring agreement.

First 10 working days

Day range	Required action	Completion evidence
Days 1-2	Conduct the IDR validation consultation and approve the target-role matrix.	Signed consultation notes and revised IDR decisions.
Days 1-4	Collect existing CV, LinkedIn, Credly, certificates and sanitised work samples.	Evidence inventory with gaps and ownership.
Days 3-5	Complete spreadsheet / data and automation baseline exercises.	Scored diagnostic and technical support plan.
Days 4-6	Choose the first process, define the problem and establish the data boundary.	One-page project charter and privacy classification.
Days 5-8	Create the 12-week calendar and enrol in the first learning milestone.	Calendar, access confirmation and week-one task list.
Days 8-10	Set up the private progress workspace and conduct the first review.	Progress board, initial artefact and agreed next actions.

CONFIDENTIALITY AND USE

This document is intended for Fernanda, her authorised manager, mentor and learning team. Do not publish contact details, assessment responses or internal review notes without consent. Public portfolio work must use sanitised or synthetic evidence.

DOCUMENT BASIS

Prepared by: Skunkworks Academy - Training and Career Development

Method: Structured interpretation of the submitted Career Growth and Learning Assessment, followed by provisional competency mapping and a recommended 12-month development design.

Validation status: Pending first consultation and practical baseline assessment.
